EXAMINATION: ~~EN~~ I B-Tech Supplementary Examination DEC 2015

SUBJECT TITLE: Engineering Drawing

BRANCH: (EEE, ECE, CSE & IT)

1. The major axis of an ellipse is 150mm and the minor axis is 100mm long. Draw the ellipse by 'concentric circles' method. Draw a tangent to the ellipse at a point on it 25 mm above the major axis.

FBI drawing

major axis - 1M

minor axis - 1M

drawing major & minor circles - 2M.

dividing of ~~the~~ circles into 12 equal parts - 2M

~~From~~ FBI drawing ellipse with dimensions - 6+2M

Drawing tangent & normal - 2M.

1+1+2+1+6+1+2
TOTAL = 14M

2. A circle of 50mm diameter rolls on the circumference of another circle of 175mm diameter & outside it. Trace the locus of a point on the circumference of the rolling circle for one complete revolution. Name the curve. Draw a tangent & a normal to the curve at a point 125mm from the centre of the directing circle.

Ans: Generating circle = 50mm, Directing circle = 175mm.
 Circumference of the generating circle = $360 \times \frac{50}{175} = 102.85^\circ \approx 103^\circ$

For drawing
 generating circle = 2m
 directing circle = 2m
 cal circumference of the generating circle = 2m.
 Dividing for construction take 12 parts
 For drawing curve = 5m
 For drawing & tangent & normal = 2m.

$[2 + 2 + 2 + 1 + 5 + 2 = 14m]$

3. A line AB is in the first quadrant, its end A & B are 20mm and 60mm in front of the V.P. respectively. The distance between the end projections is 75mm. The line is inclined at 30° to the H.P. & its H.T is 10mm above XY. Draw the projections of AB and determine its true length and true V.T.
